Introduction:

Oral hygiene maintenance is an important part that one must practice during infection from the coronavirus. Oral hygiene maintenance and oral care are the two crucial factors during COVID times. A dentist is a person who can educate the public on good oral hygiene measures. Therefore it is necessary for a dental practitioner to be well informed and updated about the oral hygiene and oral care measures during COVID.

We the Centre for Dental Education and Research, All India Institute of Medical Sciences, New Delhi are conducting this training programme for the dentists to educate them about the do's and don'ts about oral hygiene during COVID times. By virtue of this training programme, we envisage to empower the Dentists on the different oral hygiene measures to be followed by COVID patients and the different drugs used to treat the common oral symptoms occurring during COVID in patients.

Objectives:

To reiterate to maintain oral hygiene during COVID

To revisit in identifying oral symptoms and equip oneself with home based and pharmacological remedies during COVID

INTENDED AUDIENCE:

Practicing Dentists, Academicians and Dental Students.
